

RIIHAN301D Operate Elevated Work Platform

Delivered in conjunction with the Elevating work Platform Association of Australia

EWP Operator Licence 'Yellow Card'

Overview

This training program is designed for people who wish to or are required to develop the skills and knowledge needed to operate the various types of elevated work platforms. Participants may complete singular or multiple machine classes, which is dependent on the type of work they will be undertaking. There are five main types of (5) EWP classes available these are:

- Vertical Lift (**VL**)
- Scissor Lift (**SL**)
- Self-Propelled Boomlifts < 11mtrs (**BL**)
- Trailer Mounted Boomlift < 11mtrs (**TL**)
- Truck Mounted Boomlift < 11mtrs (**TM**)

OHS Training & Consultancy Services will be issuing the classes **BL** & **SL** when the training is conducted at our training facility at Eagle Farm. However customers can still be trained in only one EWP Module if required i.e.: SL-Scissorlifts.

Purpose

Federal legislation states; that an employer must provide any information, training, instruction or supervision that is necessary to protect all persons from risks to their health and safety arising from work carried out as part of the conduct of the business or undertaking. WHS Act 2011: Division 2:19.3.

It is also a requirement under the Australian Standard AS2550.10 Safe use of EWP's that only a competent person be involved in the operation of the specific type of EWP under consideration.

The Manufacturers Spec's also require only trained and competent personnel to operate the relevant EWP type (Operators Manual).

Since 1987 the Elevating Work Platform Association of Australia (EWPA) has provided operator training throughout Australia known as the 'Yellow card' training programme. Providing this type of training has assisted owners, employers and operators to meet their responsibility under the OHS & WHS Acts where a high risk work licence is not required.

As of the 11th of May 2015 the program has been developed in line with and maps directly to Nationally Recognised Training (NRT) 'RIIHAN301D-Operate elevating work platform'. Additional to the NRT unit, specific industry content has been added to further enhance skills and knowledge.

Note: If you are required to use a Boom-Type Elevating Work Platform with a height or reach of 11metres or more, a Licence to Perform High Risk Work - Class WP must be held to operate it as per WHS/OHS Legislation. Unit of Competency is TLILIC2005A. The WP LHRW is your minimum level of competency to operate these types of EWP's. You will still need to be trained in the specific unit you wish to operate.

This unit is appropriate for those working in an operational role at worksites within:

- Civil construction
- Coal mining
- Drilling
- Extractive industries
- Metalliferous mining

Prerequisites

This training program has no pre-requisite units

Dress Required: Casual, Hi-Vis Clothing/Vest, Hard Hat, Safety Shoes, and Eye Protection.

Formal ID required: i.e.: Drivers Licence

Duration

8 hours approximately.

This will depend upon on the EWP Modules being covered, the class size and the trainee's prior knowledge and experience. It takes approximately 8 hours to complete 2 EWP modules from the program.

Class size

Maximum of 6 people.

On site training is available but a minimum of 3 people (travel and parking costs may apply) will apply.

Course outline

Participants will gain theoretical knowledge and practical skills in:

- Hazard identification, risk assessment & controls
- Fall arrest harness inspection, fitting & use
- Identify safe operating parameters using data plate & manual
- Conduct pre & post operational checks
- Operation of the various EWP types
- Emergency procedures
- Theory assessment & practical observation & demonstration

Outcome

Upon successful completion of the course assessments you will be awarded a EWP operator licenced yellow card issued by the Elevating Work Platform Association of Australia for the specific type of EWP's trained in. If a Statement of Attainment is required for the 'RIIHAN301D-Operate elevating work platform-Units of Competency an additional fee will apply. Fee is \$50.00.

Venue

The program is delivered in a classroom and practical environment at the premises of JLG Industries (Australia) 223 Fison Avenue West – Eagle Farm Qld 4009. It also can be delivered at your workplace as long as there is a meeting/training room with the relevant facilities and the specific type of EWP/s (Must be compliant to AS1418 and AS2550.10) that the trainee needs to be trained in.

Fees and Charges

POA (Price on Application).

Where OHS Training & Consultancy Services receives sufficient notice of cancellation of a course (at least 24 hours), a refund of fees may be available.

A reduced rate is available if the customer requires only one (1) EWP module covered or the number of trainee's from the same company.
